

## PRESS RELEASE

July 23, 2025

# Brightleaf Solutions Enables EU AI Act Readiness with AI-Powered Contract Data Extraction Services

## Accelerating AI Governance Through Targeted Contract Clause Extraction

Brightleaf Solutions, a leading provider of AI-powered contract data extraction and analytics, today announced the launch of specialized extraction services to help organizations prepare for and comply with the newly enacted **EU Artificial Intelligence Act (EU AI Act)**. This service supports businesses in identifying and extracting critical contractual information related to the development, deployment, and use of AI systems across jurisdictions.

The EU AI Act, which officially entered into force on **August 1, 2024**, introduces a risk-based compliance framework that affects all AI systems marketed or used within the European Union, including by non-EU companies. Organizations must demonstrate governance over AI supply chains, licensing, intellectual property rights, transparency commitments, and data usage - many of which are embedded in existing contracts, policies, and vendor agreements.

**Brightleaf's AI-driven platform** uses natural language processing and machine learning to extract structured metadata from unstructured contract text at scale. This includes:

- AI model licensing terms
- Vendor responsibilities and liability clauses
- Data sourcing, consent, and usage provisions
- Confidentiality and audit rights
- Risk and compliance obligations
- Export and cross-border processing terms

"With the EU AI Act now in effect and compliance deadlines quickly approaching, many enterprises are finding it challenging to locate and assess relevant contractual obligations across thousands of documents," said **Samir Bhatia, CEO of Brightleaf Solutions**. "Our platform is uniquely positioned to help organizations gain rapid visibility into their legal obligations and align their operations with regulatory expectations."

Brightleaf's services support legal, compliance, procurement, and risk teams by delivering:

- Tailored contract clause extraction aligned to EU AI Act themes
- Cross-contract analysis to uncover gaps or inconsistencies
- Structured outputs for integration with internal compliance tools or audits
- Optional redlining, risk scoring, and contract summarization services

**Use Cases Include:**

- Auditing AI vendor contracts for high-risk system disclosure requirements
- Identifying general-purpose AI clauses to meet upcoming obligations (Aug 2025)
- Centralizing contractual data related to human oversight, data rights, and algorithm transparency

With a proven track record of processing millions of legacy contracts across sectors like healthcare, financial services, and technology, Brightleaf offers scalable, secure, and HIPAA-compliant solutions that meet the rigorous standards of global regulatory frameworks, including ISO 27001 and SOC 2 Type II certifications.

**ABOUT BRIGHTLEAF SOLUTIONS, INC.**

Brightleaf provides a technology-powered service to extract data from your contracts with extreme accuracy using our own proprietary AI/Semantic Intelligence/Natural Language Processing technology, our team of lawyers to check the output, and our Six Sigma process.

Your legacy contractual documents, along with this extracted metadata, can be migrated into a Contract Lifecycle Management (CLM) system for tracking and reporting. This greatly enhances the value of your investment in the system. The data can be virtually anything, and it is customized for each of your types of contracts. All metadata, terms and conditions, legal provisions, and even all obligations (which are usually scattered throughout your contracts) are extracted by our software. Our team of lawyers checks each-and- every extracted data point against the original documents using a stringent Six-Sigma quality process, which delivers highly accurate results.

Brightleaf gets recognized very often, including “Company of the Year” as a Contract Management Services provider. Details of this and other recognitions and awards can be found at [www.brightleaf.com/awards-recognitions](http://www.brightleaf.com/awards-recognitions)
