# Brightleaf Solutions Releases Generation 3 of its Automated Contract Data Extraction Software

## Enhanced features will speed-up the bulk extraction process saving substantial time and effort while increasing accuracy

Brookline, MA – Brightleaf Solutions, Inc., a leading provider of contract extraction and analytics solutions for tracking contract data, today announced the release of Generation 3 of its Semantic Intelligence software engine for data mining of key information from large numbers of documents.

Brightleaf's proprietary software helps analyze and abstract attributes, provisions, clauses, and even obligations from any type of contractual documents. Using customized configurations tailored to each client's requirements, the software identifies and extracts all the terms and legal provisions from executed contracts and any associated companion documents.

This Generation 3 tool also allows for automated segregation of contracts into different agreement types, matches masters and addendums, allows for batch reviews by multiple quality control experts and collates the data together. This saves substantial time and effort.  Using the latest AI, SI, ML and NLP technologies, this Generation 3 software is engineered to deliver extracted contract metadata at exceptionally high quality which speeds up the quality control review by people.

According to Samir Bhatia, CEO of Brightleaf, "This Generation 3 of the software allows users to manage different agreements types more efficiently while giving greater visibility to the user by identifying similar document types. highlighting redundant documents, and matching masters with their respective addendums and associated documents.  Brightleaf strives to enhance its technology base consistently.

Samir added that "Brightleaf is determined to strengthen and enhance its data mining technology suite to help its clients manage and track the important terms, legal provisions, and obligations hidden in all their contracts. Brightleaf is already working on the fourth generation of the software."

**ABOUT BRIGHTLEAF SOLUTIONS, INC.**

Brightleaf provides a technology powered service to extract data from your contracts at extreme accuracy using our own proprietary AI/Semantic Intelligence/Natural Language Processing technology, our own team of lawyers to check the output, and our own Six-Sigma process.

Your legacy contractual documents along with this extracted meta-data can be migrated into a Contract Lifecycle Management (CLM) system for tracking and reporting. This greatly enhances the value of your investment in the system. The data can be virtually anything, and it is customized for each of your type of contracts. All meta-data, terms and conditions, legal provisions, and even all obligations (which are usually

scattered throughout your contracts) are extracted by our software. Our team of lawyers check each-and-every extracted data-point against the original documents using a stringent Six-Sigma quality process, which delivers highly accurate results.

Brightleaf gets recognized very often, including "Company of the Year" as a Contract Management Services provider. Details of this and other recognitions and awards can be found at www.brightleaf.com/awards-recognitions
