Brightleaf Solutions Announces Delivery of Its New Generation Abstraction Platform

Co-developed through partnership with Nihilent Technologies, Pvt. Ltd.

Brookline, MA – Brightleaf Solutions, Inc. and Nihilent Technologies Pvt. Ltd. today announced the availability of the next-generation semantic intelligence engine for data mining of key data from large numbers of legal documents.

Samir Bhatia, CEO of Brightleaf Solutions said “This joint effort has yielded new thinking about an old problem: how do you get meaningful data from unstructured, English language legal documents and ensure the results are accurate and reliable. Today’s delivery of v1.0 of our new abstraction platform is the result of that.”

“We have a lot of experience with language parsing and using it to build structured databases.” stated Abhay Ghate, Chief Technology Officer for Nihilent Technologies. “Brightleaf showed us how to apply that to legal documents which use precise language and are often lengthy and complex. It’s quite different than extracting data from written forms or other textual documents such as corporate reports, books, or news stories.”

The new engine will form the backbone of Brightleaf’s legal document abstraction service.

“Abstracting from legal text documents is typically done with people.” said Samir. “If you need to extract key attributes and clauses from hundreds or thousands of documents, and you delegate it across, say, 20 people, you usually get 20 different answers. Brightleaf’s new semantic intelligence engine is rule-based so we can modify and tune it for specific document types, thus gaining the quality and consistency that only comes with automation.

“Combining this technology with an extensive people-based quality control process yields results that meet the most stringent quality requirements. Our enterprise customers tell us all the time, they need three things: quality, quality, and quality.”

ABOUT NIHILENT TECHNOLOGIES PVT. LTD.

Nihilent is a global consulting and solutions integration company using a holistic and systems approach to problem solving. Headquartered in Pune India, Nihilent’s executive team has over 450 person-years of experience in international consulting, IT outsourcing and IT services. Nihilent has made major intellectual contributions to the development of IT around the world with operations that span North America, Europe, Africa, Middle East and Asia.

ABOUT BRIGHTLEAF SOLUTIONS, INC.

Big data, BI, and data driven decisions are having a profound effect on U.S. business operations, becoming a \$143B market in 2016. Brightleaf's vision is to accelerate this adoption with technology that overcomes the challenge of mining important information from unstructured, text-based documents and making it accessible.

Brightleaf Solutions is a minority-owned, Boston-based technology start-up. With an initial focus on executed legal contracts, Brightleaf opens new doors for companies to manage risk, ensure regulatory compliance, meet customer obligations, uncover missed revenue, and get meaningful insight into their customer, partner, and vendor behavior.
