Brightleaf Solutions Launches Next-Generation Platform with Enhanced UI and Advanced Technology

Upgrade delivers faster performance, improved usability, and scalable AI-driven insights for enterprise users

Brookline, MA – Brightleaf Solutions, Inc., a leading provider of AI-powered contract data extraction and analytics, today announced the launch of its next-generation platform, featuring a significantly enhanced user interface and upgraded core technology designed to deliver a more intuitive, intelligent, and high-performance experience for enterprise users.

The redesigned user interface emphasizes simplicity, speed, and usability, enabling users to seamlessly navigate large and complex contract datasets, visualize extracted insights with greater clarity, and streamline end-to-end workflows. With improved dashboards, smarter data views, and enhanced search and filtering capabilities, users can access critical information faster and make more informed decisions.

At the core of this release is a major advancement in Brightleaf’s AI-enabled extraction engine, which is now more powerful, adaptive, and scalable. The enhanced engine leverages advanced machine learning models and configurable extraction frameworks to accurately interpret complex legal language, extract structured data from diverse document types, and expand contextual understanding across contract portfolios. This results in higher extraction accuracy, improved data normalization, and better alignment with downstream systems such as CLM platforms.

The technology upgrade also delivers significantly improved processing speeds, enabling faster ingestion and analysis of large document volumes, along with enhanced model performance that continuously learns and improves over time. The platform’s scalable architecture ensures seamless deployment across enterprise environments, supporting global organizations with high-volume, multi-format document ecosystems.

“Our latest platform upgrade reflects our commitment to continuous innovation and user-centric design. We are empowering organizations to interact with their contract data more effectively while accelerating business outcomes,” said Samir Bhatia, CEO of Brightleaf Solutions.

With this release, Brightleaf further strengthens its AI-driven extraction, expansion, and analytics capabilities, enabling clients to accelerate migration timelines, improve data accuracy and completeness, and unlock deeper, actionable intelligence from their contract and document repositories.

ABOUT BRIGHTLEAF SOLUTIONS, INC.

Brightleaf provides a technology-powered service to extract data from your contracts with extreme accuracy using our own proprietary AI/Semantic Intelligence/Natural Language Processing technology, our team of lawyers to check the output, and our Six Sigma process.

Your legacy contractual documents, along with this extracted metadata, can be migrated into a Contract Lifecycle Management (CLM) system for tracking and reporting. This greatly enhances the value of your investment in the system. The data can be virtually anything, and it is customized for each of your types of contracts. All metadata, terms and conditions, legal provisions, and even all obligations (which are usually scattered throughout your contracts) are extracted by our software. Our team of lawyers checks each-and- every extracted data point against the original documents using a stringent Six-Sigma quality process, which delivers highly accurate results.

Brightleaf gets recognized very often, including “Company of the Year” as a Contract Management Services provider. Details of this and other recognitions and awards can be found at www.brightleaf.com/awards-recognitions
