Brightleaf Solutions Upcoming Live Webinar: Overcoming the Challenges of Legacy Agreements

A live online event to discuss the importance and process of migration of legacy agreements into a system and how to conquer the associated risks

Brookline, MA – Brightleaf Solutions, Inc. is hosting a webinar to highlight the challenges faced by companies in managing and migrating their legacy contracts and associated data into enterprise level Contract Lifecycle Management (“CLM”) systems.

Managing the information in these contracts becomes as important as getting it negotiated and drafted. This drives many companies to implement sophisticated CLM systems. A common practice is to deploy the system with contracts from “this day forward”; as many companies do not know how to overcome this challenge. This will undermine the investment in the CLM; without migrating this data you will miss obligations, renewal dates, and be unable to track penalty clauses and other important data.

Brightleaf Solutions, a contract migration and data extraction service provider will host a webinar to discuss the challenges related to legacy agreements and significant steps to overcome these obstacles on May 22nd at 11am EST.

Migrating your contract documents from disparate physical locations and in different formats into a shared, structured CLM system where contract data points/attributes can be searched, mined and reported on, is a must to prevent potential losses, find hidden revenue and mitigate unnecessary risks.

The webinar will cover the full lifecycle to get the data, along with the original and OCR'd documents into a CLM using powerful AI technologies, highly trained lawyers and a Six Sigma process to get accurate information into a CLM system.

The webinar takes place on Wednesday May 22, 2019, at 11am EST is free for all. Registration and instructions are available on Brightleaf website: http://www.brightleaf.com/offerings/conquering-the-challenge-of-contract-extraction-and-migration/?utm_source=BL105

ABOUT BRIGHTLEAF SOLUTIONS, INC.

Brightleaf provides a technology powered service to extract information using our own proprietary semantic intelligence/natural language processing technology, our own team of lawyers to check the output, and our own Six-Sigma process to deliver end-to-end, highly accurate, extracted.

The data can be virtually anything, and it is customized for each of your type of contracts. All meta-data, terms and conditions, legal provisions, and even all obligations (which are usually scattered throughout your contracts) are extracted by our software. This extracted data is checked by our team of lawyers, and provided in a format for easy upload into any system, such as a Contract Lifecycle Management System (CLM), for tracking and reporting ([download Strategy Brief](#)).

This allows you to leverage the knowledge in your existing contracts, report on the extracted data, even recover hidden revenue (e.g. by policing penalty clauses in your supplier agreements) and comply with current and upcoming regulations.

Brightleaf has been recognized in many publications and has also won multiple awards, including best Contract Management Solutions Provider by CIOReview for 2017 (<http://www.brightleaf.com/awards-recognitions/>)
