# **Brightleaf Solutions Successfully Completed an Extraction Project Including 500,000 Metadata Points**

## **For a major IT company that provides services using conversational AI**

Brookline, MA – Brightleaf Solutions, Inc., a leading provider of contract migration, data extraction, and analytics, is pleased to announce that it has recently completed a contract data extraction project for one of the biggest technology companies that offer conversational artificial intelligence (AI) services. The project involved the extraction of close to 500,000 data points from a complex data set, which was a significant undertaking.

Brightleaf's team of experts worked closely with the client to develop a tailored solution that could efficiently extract the required data points from the large and complex data set. Using advanced data extraction tools and techniques, followed by a human review, Brightleaf was able to accurately and efficiently extract the data points, delivering high-quality results to the client.

"We are thrilled to have had the opportunity to work with one of the biggest technology companies in the industry," said Brightleaf's CEO Samir Bhatia. "This project was a testament to our team's expertise in data extraction and our ability to deliver high-quality results on time. We are committed to providing our clients with the best possible service and look forward to continuing to support them in their data extraction needs."

The successful completion of this project demonstrates Brightleaf's commitment to providing high-quality data extraction services to its clients. With its expertise in data extraction, Brightleaf is well-positioned to support organizations across a wide range of industries, helping them to extract valuable insights from their data sets and make more informed business decisions.

### **ABOUT BRIGHTLEAF SOLUTIONS, INC.**

Brightleaf provides a technology-powered service to extract data from your contracts with extreme accuracy using our own proprietary AI/Semantic Intelligence/Natural Language Processing technology, our team of lawyers to check the output and our Six Sigma process.

Your legacy contractual documents along with this extracted meta-data can be migrated into a Contract Lifecycle Management (CLM) system for tracking and reporting. This greatly enhances the value of your investment in the system. The data can be virtually anything, and it is customized for each of your types of contracts. All meta-data, terms and conditions, legal provisions, and even all obligations (which are usually scattered throughout your contracts) are extracted by our software. Our team of lawyers checks each-and-every extracted data point against the original documents using a stringent Six-Sigma quality process, which delivers highly accurate results.

Brightleaf gets recognized very often, including “Company of the Year” as a Contract Management Services provider. Details of this and other recognitions and awards can be found at [www.brightleaf.com/awards-recognitions](http://www.brightleaf.com/awards-recognitions)
