

BRIGHTLEAF  
THIRD PARTY PAPER DATA  
EXTRACTION  
AI Software License

# DATASHEET

## Partner Platform

Brightleaf's AI Extraction Engine uses semantic intelligence and natural language processing technologies to deconstruct and analyze contracts to extract any information, including, but not limited to data elements, commercial terms, legal provisions/clauses, obligations, and even tables from contracts.

This powerful AI engine can be integrated into any CLM platform for any third-party paper that comes into the system for negotiation. This document can be sent to Brightleaf's AI Engine to detect and extract the information desired by each agreement type.

Brightleaf's powerful AI extraction software can be embedded into the workflow of the CLM platform system to enable quick extraction of meta-data from contracts. This integration allows for the reviewer to verify or change any extracted information before populating the agreement record into the system. Clauses and provisions can also be compared to the standard clause library for redlining. Tables can be extracted and ingested into the configured platform agreement record.

### Key Capabilities of Brightleaf's AI Extraction Engine

- Extract data from the Third Party Paper automatically
- Ingest into most of the CLM and ERP systems
- Extract data in real time
- Get insights into key provisions at fingertips
- OCR the documents for searchability
- Configure any attribute, even your specific ones
- Secure and scalable architecture

### Brightleaf Automated Contract Extraction Enables You To

- Keep your ERP or contract lifecycle management system up-to-date.
- Ensure compliance with existing contracts.
- Avoid penalties and find missing revenue.
- Gain strategic insights into overall legal obligations, risks, and opportunities.
- Save time and money hiring expensive abstraction firms.

**For us security of your data and quality of our out put  
is the first priority, Brightleaf is:**

**ISO 27001:2013  
Certified**

**SOC 2 Type 1  
Attested**

**ISO 9001:2015  
Certified**

# PRODUCT FEATURES - THIRD PARTY PAPER DATA EXTRACTION AI SOFTWARE LICENSE

## INTERFACE

- Clean API for connection with Partner CLM systems

## SECURITY

- Encrypted data in transit or at rest

## CONFIGURE

- Add/delete attributes at any stage of the extraction
- Define and extract any custom attributes
- Pre-Written rule sets for easy extraction

## EXTRACT

- Detect/Extract clause and provision
- Table Extraction
- Standard clauses v/s Non-Standard clauses comparison
- Compare and red-line clauses against your standard clause library
- Check extracted information visually against your original document
- Quality check within the application

## BRIGHTLEAF - PARTNER PLATFORM INTEGRATION

- A list of standard attributes and provisions can be viewed on [www.brightleaf.com/standard-attributes](http://www.brightleaf.com/standard-attributes)
- For customization of these standard attributes or definition of custom attributes, please contact Brightleaf at [info@brightleaf.com](mailto:info@brightleaf.com)

### About Brightleaf:

Meet our Software: Brightleaf has its own AI/NLP Software to analyze contracts and extract/track all meta-data elements, clauses/provisions, obligations, and any custom attribute to client specifications. This AI Software can be licensed by companies as SaaS software. The extraction engine has also been integrated into CLM systems for Third-Party Paper data extraction and legal review. Please [click here](#) for more info.

Meet our Service: Brightleaf uses its AI Software for legacy contract migration into a CLM system, providing a complete service for meta-data/clause extraction, clause comparison, contract risk scoring, etc. for a large number of contracts. This service includes de-duplication of documents, matchups of masters and addendums/creation of contract hierarchy, renaming files, etc. so that perfect data, the original file and the OCR'ed PDF file are ingested into a CLM.
