Time

## The Challenges

Before partnering with Brightleaf, the client faced:

- Contracts scattered across three platforms, laptops, and physical files
- No standardized metadata model or naming convention
- Reporting delays and manual review bottlenecks
- Limited visibility into expired or duplicated agreement

★ High urgency + regulatory pressure + scalability blockers

## The Brightleaf Solution

### Discovery & Scoping

Define scope and target schema.

### AI-Powered Extraction

Rapid extraction of key terms.

### Attorney-in-Loop Validation

100% human-validated data.

### Deduplication + Cleanup

Remove noise and refine data.

### CLM-Ready Delivery

Structured data delivered to CLM.

### Schema

Blueprint for data structure.

### Validation

Legal review and quality check.

### Delivery

Deployment to target system.

## Business Impact Delivered

- Lower review overhead even as business scaled.
- Revealed additional contractual terms requiring tracking.
- Improved governance with validated metadata structures.
- Single source of truth for all agreements.
- 50% faster turnaround time.
- Analyse insights and adapt

## Measuring the Efficiency Gain

With the mess cleared, the team required fewer resources to review contracts, lowering delivery costs even as the business grew. The impact was immediate and sustained.

### Old Way

Hunting for PDFs

### New Way

Instant Metadata Search

### Why it worked

- Understood Business Logic
- Tracked What Mattered
- Removed Dead Weight

“

*“Within the first year of launching the new contract database, turnaround time for contracts improved by more than 50%, and even as the business grew, the efficiency of the new database allowed lower cost of delivery due to the need for fewer contract review resources.”*

– Client Executive, Financial Services
